

NESST: New Entrepreneurial Student Society Twente

Graduation Assignment Netherlands Growth & Founder

Each half year Stichting NESST organizes an honours program on entrepreneurship for students and young professionals. During this half year the participants will learn everything in regard to entrepreneurship and will start their own start-up. The participants will start with Ideation and work during their journey towards the first investment round, the Dragons' Den, through which they are guided by experienced and successful entrepreneurs from the region, our mentors.

Our non-profit organization would like to position itself in multiple cities in The Netherlands by creating establishments in each of these cities. With this we would like to be able to offer our honours program to all the students and young professionals in The Netherlands. To be able to successfully create an establishment in a city in The Netherlands and organize the program, the establishment first has to be founded along with running a pilot program in the to be determined city to see if there is a need for our honours program there as well. From there, if found successful, the preparations for the first season of NESST of that establishment will have to be done to ensure a successful start by the first board of NESST there.

Are you a student and are you interested in doing research on the area of entrepreneurship and helping our non-profit organization further? Do you want to make an impact on a growing non-profit organization in The Netherlands which already successfully helped 60 students and young professionals over the past 2 years, out of which 20 have started a successful start-up? Make sure to apply!

Your responsibilities:

- Together with the Supervisory Board you will look at the possibility for a new establishment of NESST Netherlands and work out a plan to do this.
- Perform a research on the environmental environment in the chosen city.
- Contact relevant organizations within the entrepreneurial environment.
- Run a pilot of the NESST program together with other NESSTors.
- Make preparations for the 1st full season this NESST establishment.
